WHAT IS CPRP?
The Community Psychiatric Rehabilitation Program (CPRP) is a community living program for individuals whose mental illness is accompanied by a diagnosis of substance use. CPRP consumers live in their own homes within the community, gathering on a daily basis where they are provided life skills enhancing services and educated on general self-care needs.

WHAT IS THE GOAL OF CPRP?
The goal is to develop a personal support system while enhancing skill levels and abilities to where one may perform at their highest level of daily functioning. By monitoring the consumer’s behaviors and assessing their need for ongoing services on an outpatient basis, CPRP’s goal is to help the individual to be more productive in the community, while preventing hospitalization due to increased symptoms of their mental illness.

ADMISSION CRITERIA
To be eligible for CPRP services, one must have a qualifying mental health disorder or disability, and when accompanied by a history of substance use will be offered ITCD services. The Program is funded by Missouri Health Net and certified by the Missouri Division of Behavioral Health.

CPRP CONSUMER SERVICES
