A full array of services for our clients with Mental Health and Substance Use Disorder treatment needs is offered through outpatient offices located in several areas in Southeast Missouri.

Our agency offers specialized services based on individual client needs and is an Integrated Treatment for Co-Occurring Disorders (ITCD) provider. We offer Community Support Services based on client needs identified upon completion of an initial assessment, which is typically completed on the first visit.

We offer services to those with Co-Occurring Disorders (Substance Use Disorder + Mental Health). Our Professional, Licensed mental health providers understand that both issues must be properly addressed to provide the highest standard of treatment. Our goal is for our clients to realize their full potential without the use of substances, while keeping symptoms to a minimum.

Our primary goal is to make the lives of our clients more fulfilling and productive so they can live successfully in the community in the least restrictive manner.
