DID YOU KNOW?

- Two out of every five people in the United States will be involved in an alcohol related motor vehicle crash at some time in their life.

- Almost half of all traffic fatalities are related to alcohol.

- Drunken driving accidents remain the leading cause of death of people ages 15 to 24.

- Since 1994 more than 500 Missourians have died each year in alcohol related traffic accidents.

- In Missouri, the Substance Awareness Traffic Offenders Program (SATOP) serves more than 30,000 DWI offenders annually who are referred as a result of an administrative suspension or revocation of their driver license, court order, condition of probation, or plea bargain.

For more information on DWI, the effects of substance use or treatment options, please contact the location nearest you:

What is SATOP?

The Substance Awareness Traffic Offenders Program (SATOP) is a statewide network of comprehensive programs providing a community based service for those with alcohol and drug related driving offenses. Individuals are referred to their choice of Missouri SATOP Programs certified by the Missouri Department of Mental Health, Division of Behavioral Health.

Southeast Missouri Behavioral Health is fully certified by the Department of Mental Health to provide all levels of SATOP services. Our professionals providing these services are fully certified and trained.

The screening process consists of the Drivers Risk Inventory (DRI), which is a list of standard questions regarding substance use, followed by an assessment by a qualified professional. Referrals are made based on the assessment to an appropriate program. The four levels of SATOP Programs include:

- **OEP**
  The Offender Education Program (OEP), is a two-day, 10-hour educational/awareness program designed primarily for first time DWI offender.

- **WIP**
  Weekend Intervention Program (WIP) is an intensive counseling, intervention and education program conducted in 48 consecutive hours over one weekend, in a structured environment. The WIP program is designed primarily for second time DWI offenders.

- **CIP**
  Clinical Intervention Program (CIP) is an intensive outpatient treatment program. Participants must complete 50 hours of clinical services scheduled over a minimum of 5 weeks. The CIP consists of 10 hours of individual counseling, 20 hours of group counseling and 20 hours of group education. The program hours are designed to be convenient for those who are employed full-time or who have child care responsibilities.

- **SROP**
  Serious and Repeat Offender Program (SROP) is an intensive outpatient treatment program. Participants must complete 75 hours of clinical services scheduled over a minimum of 90 days. The SROP consists of 35 hours of individual and/or group counseling. The program is designed for those who are a serious or repeat DWI offender with considerable or extreme substance use problems.

COST

Cost for each segment of SATOP is set by the Department of Mental Health and is the same throughout Missouri. The WIP, CIP and SROP cost is set on an income based, sliding fee scale.
